- Back on **Green Anglicans**: as we promised in our previous article that we are going to expand on the two focal points which we suggest to be our central focus in making sure that we champion the concept of green Anglican as the diocese. Here are some details of the focal points.

1. Moving towards green point is a concept that focuses on planting e.g. flowers, herbs, vegetables, trees etc. It is our suggestion, as the portfolio committee on environment, that Anglicans throughout the diocese, use their own personal spaces, church sites and public spaces (schools) regardless of size, for planting. This move encompasses various spheres of our needs, such as alleviation of poverty (hunger and lack of food), creates job opportunities and brings a healthy and clean environment.

2. Environmental care:

This concept is specifically about keeping our environment clean.

How? By making sure we have and utilise dumping areas in our communities, for our homes we make sure we keep our yards clean at all times. If we keep our environment green through concept 1, this will ensure that our environment is clean and safe.

In our next article we are going to put before you the examples on how these two concepts can be implemented, individually or as a group.

We encourage every parish in our diocese to provide and create space and time for these focal points. Our next article will be expanding on how to work on each of these focal points.

We therefore appeal to clergy and parish councils to support the concepts, **have representatives** in the council and also have **parish coordinators** to work these concepts specifically.

- **Note to Clergy: Police clearance certificates:** Please make sure that the Bishop's office has a copy of your police clearance certificate as a matter of urgency.
